

European Letters in EFI's Manuscript Fonts European.pdf

All of our Manuscript fonts have the European variations of the Latin alphabet. These are the ways to enter the unique European characters, depending on the type of computer (Mac or Windows), and word processor.

NOTE: If you are using a word processor with AutoCorrect features (such as Microsoft Word and OpenOffice), it is possible that AutoCorrect might change some of the characters. See the Troubleshooting pages on www.educationalfontware.com or the Troubleshooting documents on your CD for more information.

Macintosh computer: You use Shift (S) and Option (O) keys, in combination with one or more letters, to produce the European letters. There is a problem, however - there is no way to enter the Y acute and y acute characters on the Macintosh.

Windows computer:

- **shortcut:** Hold the CTRL or CTRL and SHIFT key (s), type the next character, let go of the CTRL (and SHIFT) key(s), and then type the letter.
- **alt code, Microsoft Word and WordPad only:** use the numeric keypad (the small pad on the right of the keyboard). Hold the Alt key and type 0nnn on the numeric keypad.

	Mac	Windows alt code	Windows shortcut
