

Educational Fontware, Incorporated

Cursive That Connects™

The Educational Fontware DVDs contain ALL our Manuscript and Cursive fonts, plus Specialty and Decorative Fonts, for Windows 95 through Windows 8 and Macintosh OS X. We have five groupings of fonts on the DVD: Schools/Homeschoolers, Australian, foreign, Hawaiian, and Specialty and Decorative fonts. The DVDs have Sample Sheets for all of our font families (a family is a style of handwriting, such as D'Nealian® or Handwriting without Tears®), organized in the same five groupings. You may install any of our (more than 900) fonts.

Benson Handwriting books are © by Perfection Learning Corporation. SuperKids is ® Rowland Reading Foundation, Inc. For more information about our fonts, see our home page.

Licenses and Upgrades

Site License \$300. You may install any of the fonts on all computers at school, all teacher's home computers, and special ed students' home computers. In general, we consider a site to be one building (such as one elementary school). However, if two or more schools share one principal, or there are several small schools (no more than 100 students each), we will consider lumping multiple buildings under one license.

District Special Ed License \$300. Covers all the Specialists (SLPs, OTs, PTs, paraprofessionals) on all their computers in the district, plus all the Specialists at home. Special Ed students and their parents may also install the fonts on their home computers.

Single User \$49.95. For use on one computer at school, and one teacher's home computers. Not for commercial use.

District License - buy a Site License for all your elementary schools (\$300 each), and you qualify for a District License. A District License permits all the teachers at all the schools to use our fonts, both at school and at home. The fonts may be installed on all the computers at all schools (high, middle, alternative, special ed, intermediate, ...). In addition, parents of special ed students may install and use our fonts on their home computers.

Why upgrade? This information is primarily for future use. When Microsoft, Apple, OpenOffice, and other software companies update their products, we frequently have to update our DVDs so that our installers and Linkletter programs run with their new software. For example, we had to redo ALL of our fonts and Mac Linkletter programs when Microsoft released Word 2004 on the Mac. We had to buy a new program in order to make installers that would run on Windows Vista. Apple's release of OS 10.7 meant we had to redo all of our Mac installers. The 64 bit version of Windows 8.1 caused us to have to change about 200 of our fonts. Who knows what is next.

Customers receive a discounted price when they upgrade to a new DVD. If a school buys a Single User license and decides to upgrade to a Site License, we give full credit for the Single User purchase(s).

Contact us for more information about Licenses and Upgrades.
